PROFILE

Hello! I'm Jenish , I am a student started to learn various skills as my passion. I'm pretty good at web developing and design thinking .

SKILLS

- Web Development
- Wireframe Creation
- UI/UX Design
- Front End Development
- Android app Development
- Fullstack Development(React , Node js, Express js)

COURESES COMPLETED

Frontend Development By University of Michigan

- Completed Specialization in HTML5, CSS3, and JavaScript for creating interactive web experiences
- Proficient in writing syntactically correct HTML5 and CSS3 code
- Developed high-quality websites that are responsive and accessible on various devices
- Demonstrated expertise in accessible web design and implementation
- Created a professional-quality web portfolio showcasing growth as a web developer

Backend Development By IBM

- Create server-side applications using the Node.js JavaScript run time.
- Extend your Node.js applications with third-party packages and frameworks, including Express.
- Use npm to manage Node.js packages in your Node.js application.
- Develop asynchronous callback functions and promises to complete asynchronous operations.

EDUCATION

SECONDARY SCHOOL

Nirmala matric higher secondary school
2018 - 2020

BACHELOR OF TECHNOLOGY

Anna University BIT campus, Trichy
2020 - current*

COURESES COMPLETED

Android Development By Meta (Current)

- Mastered essential Android programming concepts and gained proficiency in developing applications
- Acquired knowledge on using the Kotlin Playground for experimentation and learning
- Created user interfaces (UI) for mobile apps using Android Studio
- Demonstrated skills in managing the lifecycle and data collections of mobile applications
- Worked with web technologies and persistent data on Android applications
- Applied best practices for designing UI and enhancing user experience in mobile applications
- Developed cross-platform applications using React Native framework
- Prepared effectively for technical interviews specifically for Android developer roles

ACHIEVEMENTS

Mobile Recommendation System
Project Link - https://github.com/jenishr0/Mobile-recommendation-system

- This project is a mobile recommendation system that uses content-based filtering and cosine similarity to suggest mobile devices to users.
- Implemented in Python, it utilizes pandas for data manipulation and scikit-learn for machine learning.
- The system provides a user-friendly interface and is capable of making personalized recommendations .

Plantify
Project Link - https://github.com/jenishr0/Plantify

- This is an app built with Python and Flask, utilizing an API to display household plant descriptions and prices.
- Users can create an account to store their personal details and purchase history.
- The app is containerized with Docker and deployed using Kubernetes for efficient and scalable management.

Portfolio
Project Link - https://github.com/jenishr0/jenishr0.github.io

- Developed a portfolio website using React framework
- Implemented the website's layout and styling using HTML, CSS, and JavaScript
- Ensured responsive design for optimal viewing on different device types and sizes.
